Application Specialist (m/f) ***(201808AS)***

rqmicro AG

Our vision is that consumers worldwide benefit from water and food free from microbiological contamination. This is why we developed a technology that delivers quantitative results at an unmatched speed. rqmicro AG, based in Schlieren, builds and markets solutions for water and food safety applications.

We are looking for an Application Specialist to join rqmicro's assay development team. Responsibilities for this position include:

- Drive rqmicro's sales growth through delivering exceptional technical support to customers in field sales or demonstrations.
- Provide training and information to customers: conduct workshops, small groups and one-on-one training. Perform troubleshooting at the customer facility as well as by telephone.
- Actively participate in the development, improvement and validation of assays for the detection of pathogenic bacteria.

Your profile:

- MSc or PhD degree in biochemistry, microbiology, biotechnology or related field
- At least 2 years of relevant work experience, preferably in an industrial setting
- Experience with flow cytometry, immunoassays and BSL-2 lab environment
- Open minded; enjoying to interact and communicate with customers
- Initiative and self-driven personality with excellent verbal and written communication skills
- Fluent in English and German (written and oral)
- Well-organized, team player, willing to take responsibility

We offer:

- The opportunity to revolutionize microbiology on a global scale
- An inspiring and international team
- A chance to make a real impact in a fast growing start-up company

Please send your CV and a cover letter via email, using the reference 201808AS:
